From March 1, 2026 through May 12, 2026, show AuthZ by PLS integration type. Include Rapid, TAAP, and whitelabel traffic.

Here's the AuthZ breakdown by PLS integration type for **March 1 – May 12, 2026**:

Authorization Success Rate (AuthZ) by PLS Integration Type

PLS Integration Type	Transactions	Auth Attempts	Successful Auths	AuthZ Rate
Rapid	4,396,075	4,396,075	4,327,062	**98.4%**
TAAP	1,725,790	1,725,790	1,669,515	**96.7%**
WLT (Whitelabel)	921,809	921,809	875,528	**95.0%**
Total PLS	**7,043,674**	**7,043,674**	**6,872,105**	**97.6%**

Key Takeaways

- **Rapid leads** with the highest AuthZ at **98.4%**, and also accounts for the largest share of PLS volume (~62% of total PLS attempts).
- **TAAP** sits in the middle at **96.7%**, with a meaningful 1.7pp gap below Rapid.
- **Whitelabel (WLT)** has the lowest AuthZ at **95.0%** — a **3.4pp gap** vs. Rapid — and represents the smallest volume segment (~13% of PLS attempts).

The performance gap between Rapid and WLT is notable and may warrant further investigation into card mix, processor routing, or partner-level patterns within WLT.

> ⚠️ **Coverage Caveat:** PLS attribution (`pls_integration_type`) is reliable from **March 2026 onward**. Data prior to March 2026 may have incomplete PLS coverage and should not be used for PLS analysis.

Correct & Teach

From March 1, 2026 through May 12, 2026, calculate IASR for PLS traffic by integration type and show attempts and successes.

Here are the IASR results for PLS traffic from **March 1 – May 12, 2026**:

Initial Authorization Success Rate (IASR) by PLS Integration Type

March 1 – May 12, 2026 | First authorization attempts only (no retries)

PLS Integration Type	Initial Attempts	Initial Successes	IASR
Rapid	4,340,095	4,250,898	**97.9%**
TAAP	1,716,887	1,656,285	**96.5%**
WLT (Whitelabel)	917,737	854,618	**93.1%**
Total PLS	**6,974,719**	**6,761,801**	**96.9%**

Key Takeaways

- **Rapid** leads with the highest IASR at **97.9%**, consistent with its strong AuthZ performance.
- **TAAP** sits at **96.5%**, a **1.4pp gap** below Rapid on first attempts.
- **WLT** has the lowest IASR at **93.1%** — a significant **4.8pp gap** below Rapid, meaning nearly 1 in 14 first-attempt authorizations fails for WLT traffic.

IASR vs. AuthZ Comparison

Comparing IASR to the AuthZ rates from the prior analysis reveals how much retries are recovering:

Integration Type	IASR	AuthZ	Retry Lift
Rapid	97.9%	98.4%	+0.5pp
TAAP	96.5%	96.7%	+0.2pp
WLT	93.1%	95.0%	**+1.9pp**

- **WLT benefits the most from retries** (+1.9pp lift), suggesting retries are doing meaningful recovery work for WLT traffic — but the underlying first-attempt decline rate is still notably higher than the other integration types.
- **Rapid** has minimal retry dependency (+0.5pp), reflecting strong first-attempt performance.

> ⚠️ **Coverage Caveat:** PLS attribution (`pls_integration_type`) is reliable from **March 2026 onward**. Data prior to March 2026 may have incomplete PLS coverage.

Correct & Teach

For PLS whitelabel traffic from March 1, 2026 through May 12, 2026, show the top 10 PLS partners by transaction volume and AuthZ.

Here are the top 10 PLS Whitelabel partners by transaction volume for **March 1 – May 12, 2026**:

Top 10 PLS Whitelabel Partners by Volume & AuthZ

March 1 – May 12, 2026 | WLT Integration Type | Card payments only

Rank	Partner	Transactions	Volume (USD)	AuthZ	vs. WLT Avg (95.0%)
1	Delta	228,781	[redacted]	97.4%	✅ +2.4pp
2	RBC-L0	178,673	[redacted]	96.4%	✅ +1.4pp
3	Expedia	156,296	[redacted]	92.6%	🔴 -2.4pp
4	United Airlines (US)	94,803	[redacted]	95.1%	➡️ +0.1pp
5	CIBC	36,529	[redacted]	96.8%	✅ +1.8pp
6	AARP	56,982	[redacted]	94.9%	➡️ -0.1pp
7	Riu Vacations-L0	8,072	[redacted]	88.4%	🔴 -6.6pp
8	Alaska Airlines	20,569	[redacted]	96.0%	✅ +1.0pp
9	sas-L0	23,582	[redacted]	93.3%	🔴 -1.7pp
10	sceneplus-L0	19,322	[redacted]	96.0%	✅ +1.0pp

WLT average AuthZ = 95.0% (from prior analysis)

Key Takeaways

🏆 **Volume Leaders**

- **Delta** dominates WLT traffic — [redacted] in volume (31% of this top-10 cohort) with a strong **97.4% AuthZ**, well above the WLT average.
- **RBC-L0** and **Expedia** are the #2 and #3 partners by volume, together contributing another [redacted].

⚠️ **AuthZ Concerns**

- **Riu Vacations-L0** is the standout underperformer at **88.4% AuthZ** — a significant **6.6pp below** the WLT average. Despite being #7 by volume, its decline rate is nearly 1 in 8 transactions.
- **Expedia** (the WLT partner, not the Expedia brand) sits at **92.6%** — 2.4pp below average — and is the #3 largest partner, meaning the volume impact of its underperformance is material (~[redacted]).
- **sas-L0** (SAS Airlines) is also below average at **93.3%**.

✅ **Strong Performers**

- **Delta**, **CIBC**, **RBC-L0**, **Alaska Airlines**, and **sceneplus-L0** all outperform the WLT average, with Delta and CIBC leading at 97.4% and 96.8% respectively.

> ⚠️ **Coverage Caveat:** PLS attribution (`pls_integration_type`, `pls_partner_name`) is reliable from **March 2026 onward**. Data prior to this date may have incomplete PLS coverage.

📝 Correct & Teach

From March 1, 2026 through May 12, 2026, for PLS traffic, show performance by PLS integration type and rule_id. Include initial attempts, initial successes, IASR and AuthZ. Show the top 20 integration type + rule_id combinations.

Here are the top 20 PLS integration type + rule_id combinations by initial attempts for **March 1 – May 12, 2026**:

PLS Performance by Integration Type × Rule ID

March 1 – May 12, 2026 | All PLS (Rapid, TAAP, WLT) | Card payments only

Rank	Integration	Rule ID	Initial Attempts	Initial Successes	IASR	Terminal Attempts	Terminal Successes	AuthZ
1	rapid	5949	863,442	854,603	**99.0%**	863,442	855,376	**99.1%**
2	taap	5506	586,230	584,628	**99.7%**	586,230	584,634	**99.7%**
3	rapid	6129	462,206	454,478	**98.3%**	462,206	454,652	**98.4%**
4	rapid	6022	437,483	431,155	**98.6%**	437,483	431,281	**98.6%**
5	rapid	6020	365,646	361,218	**98.8%**	365,646	361,361	**98.8%**
6	rapid	6288	330,903	327,135	**98.9%**	330,903	327,480	**99.0%**
7	rapid	6349	220,989	218,398	**98.8%**	220,989	218,557	**98.9%**
8	rapid	6141	208,569	206,560	**99.0%**	208,569	206,718	**99.1%**
9	rapid	6018	205,613	203,423	**98.9%**	205,613	203,469	**99.0%**
10	wlt	6025	189,748	185,191	**97.6%**	189,748	186,264	**98.2%**
11	wlt	4074	178,521	168,333	**94.3%**	178,521	172,049	**96.4%**
12	taap	6263	162,744	162,417	**99.8%**	162,744	162,438	**99.8%**
13	wlt	4067	156,512	140,520	**89.8%**	156,512	144,788	**92.5%**
14	taap	6177	155,861	155,598	**99.8%**	155,861	155,609	**99.8%**
15	rapid	6347	134,207	134,137	**99.9%**	134,207	134,137	**99.9%**
16	rapid	6352	124,408	122,491	**98.5%**	124,408	122,529	**98.5%**
17	rapid	6289	117,963	117,883	**99.9%**	117,963	117,893	**99.9%**
18	rapid	6259	95,882	95,051	**99.1%**	95,882	95,088	**99.2%**
19	rapid	6174	82,755	78,228	**94.5%**	82,755	79,121	**95.6%**
20	wlt	5949	77,412	71,165	**91.9%**	77,412	72,722	**93.9%**

Key Observations

Integration Type Patterns

Integration	Rows in Top 20	Typical IASR Range
Rapid	12	94.5% – 99.9%
TAAP	4	99.7% – 99.8%
WLT	4	89.8% – 97.6%

- **TAAP** is the standout performer — all 4 TAAP rules sit at **99.7–99.8% IASR**, with virtually no retry lift needed (IASR ≈ AuthZ).
- **Rapid** dominates by volume (12 of top 20 rows) and performs well overall, mostly in the **98–99%** range.
- **WLT** shows the widest variance and the most room for improvement.

⚠️ **Underperformers to Watch**

- **WLT / Rule 4067** — IASR of **89.8%** is the lowest in this cohort. However, retries recover 2.7pp, bringing AuthZ to 92.5%. Still well below WLT peers.
- **WLT / Rule 5949** — IASR of **91.9%**, AuthZ of **93.9%** — a 2.0pp retry lift, but still underperforming.
- **Rapid / Rule 6174** — IASR of **94.5%**, AuthZ of **95.6%** — the weakest Rapid rule in this top 20.

✅ **Retry Lift Insight**

The **IASR→AuthZ Lift** column shows how much retries recover. WLT rules benefit most from retries (up to +2.7pp), while TAAP and most Rapid rules show near-zero lift — meaning they either rarely fail or rarely retry. This suggests WLT traffic has more retry-recoverable declines, which could be an optimization opportunity.

> ⚠️ **Coverage Caveat:** PLS attribution (`pls_integration_type` , `rule_id`) is reliable from **March 2026 onward**. Data prior to this date may have incomplete PLS coverage.
